RON SOFTWARE

CAFETERIA RON SOFTWARE

We offer a solution for meal ordering with the very same identification medium that is used for attendance registering. Thus, the boarder uses the same ID medium for a number of actions. The data processing offers a quick and comprehensive output for operation of the kitchen and for the calculation of meal allowance.

CAFETERIA RON SOFTWARE

CAFETERIA works as a credit or a deduction system, which minimises the flow of cash. The implementation of this system also eliminates the risk of meal vouchers being forged by personnel, ensuring the smooth and efficient operation of the cafeteria and kitchen.

Modularity of the system enables it to be implemented into cafeterias where the meals are only ordered and distributed, and the food is supplied by a catering company, or in companies with their own kitchen. The system covers all issues of company and school cafeterias. It can be used in small companies, where only lunch is provided, or in big companies with a three-shift operation, where the system can be complemented by the SKLAD/WAREHOUSE module to be able to sell complementary goods.

WE HAVE CONTENTED CUSTOMERS

OUR PRODUCT IS USED BY COMPANIES WITH THOUSANDS OR DOZENS OF EMPLOYEES. BY IMPLEMENTATION IN VARIOUS BRANCHES WE PROVE OUR VARIABILITY AND COMPLEXITY OF OUR SOLUTION (CAR INDUSTRY, CIVIL ENGINEERING, ENERGY, GAS, WATER MANAGEMENT, HEALTH CARE, FINANCE AND BANKING, PUBLIC ADMINISTRATION, ETC.).

CAFETERIA
INFORMATION ABOUT
THE PRODUCT

WHY SHOULD WE IMPLEMENT A SYSTEM FOR CAFETERIA?

By implementing a system for your cafeteria you can accurately monitor the meals taken by the employees.

The cafeteria system is fully automatic. The menu can be easily imported from Excel. Orders are closed automatically and you can send emails about numbers of orders directly to the caterer. The key feature is the interconnection to the attendance system provided by our company.

The ATTENDANCE software supplies information on the number of claims for subsidised and non-subsidised meals. This fact is taken into account when accounting the taken meals. Information on the account of the boarder is exported into the wage system.

ADVANTAGES OF OUR SOLUTION

+ FULLY AUTOMATIC OPERATION
+ MAXIMAL INTERCONNECTION OF THE CAFETERIA, ATTENDANCE AND WAGES SYSTEMS
+ ORDER OR NO-ORDER CAFETERIA SYSTEM
+ SOLUTIONS FOR SCHOOL CAFETERIAS
+ POSSIBLE TO EXPAND BY THE WAREHOUSE MODULE

INFORMATION ABOUT
THE PRODUCT

TYPES OF INSTALLATION

The cafeteria system can be installed in various modifications. Individual options vary in the manner of ordering and distribution of meals. "Classical" or modern terminals with a touch screen can be used. Meals can also be ordered via an internet browser.

THIS IS A STANDARD ORDER AND DISTRIBUTION SYSTEM. The boarder orders a meal for a specific day on the ordering terminal or via an internet browser using his/her ID medium. When the meals are distributed, the boarder approaches the medium to a scanner and the number of the meal is displayed. The member of personnel confirms distribution of the meal by pushing a button.

A SYSTEM WITHOUT ORDERS
The boarder does not order the meal in advance. When taking the meal, the boarder puts his/her ID medium to the distribution terminal and selects the required meal by pushing a button. The number of the meal is displayed and the member of personnel confirms its distribution.

COMPONENTS OF THE CAFETERIA SYSTEM

+ terminals for ordering and distribution of meals
+ the CAFETERIA software for system administration
+ analysis and implementation of customer requirements
+ user and administrator training
+ implementation of interconnection with a superordinate system, interconnection with the attendance and wages systems

DECISIVE FEATURES

+ MAXIMAL SIMPLIFICATION OF THE CAFETERIA SYSTEM
+ MENU IMPORT FORM EXCEL
+ AUTOMATICALLY SENT EMAILS WITH ORDER DETAILS TO THE CATERER
+ INTERCONNECTION WITH THE ATTENDANCE AND WAGES SYSTEMS
+ INPUTS FOR CATERERS, BOARDERS AND THE PAYROLL ACCOUNTANT
